- Minor Bugs & Minor Improvements.

	Issue Type	Issue Key	Summary	Description
1	New Feature	A4L-11145	Cascading Custom Fields	Users now can establish cascading custom fields. This feature allows you to pick an option from a dropdown list, and based on your selection, a new set of options will dynamically appear.
2	New Feature	A4L-10549	Cost Center - Analytical Accounting	The Lexzur billing module has been enhanced to support analytical accounting, specifically introducing the cost center feature. This update enables the management of multiple cost centers within the billing forms, empowering users to allocate a percentage to each specific cost center. Additionally, reports have been modified to illustrate the distribution of expenses across various cost centers.
3	New Feature	A4L-10283	Litigation Timeline	Litigation stages and activities are now visualized in a timeline format, showcasing all associated court and hearing details.
4	New Feature	A4L-10014	New Add/Edit Hearing UI /UX	An updated form has been introduced for adding and editing hearings, featuring an improved and user-friendly UI/UX design for enhanced usability.
5	New Feature	A4L-9624	New Expense Add Form	Introducing a new form for adding Expenses, featuring an enhanced and user-friendly UI/UX for improved ease of use.
6	New Feature	A4L-9613	"Forgot my Password" feature in the client portal login	The "Forgot My Password" feature is now accessible on the CP login, allowing clients to easily reset their passwords when needed.
7	New Feature	A4L-9567	Quick filters on Client Portal Grids	Clients and requesters can now effortlessly apply filters to various matters and contract fields, including status, type, name, etc. Additionally, they have the option to export the results to Excel.
8	Improve ment	A4L-11335	Revamped User Group Permissions Page	Presenting a revamped UI/UX for the User Group Permissions page, featuring an enhanced view and a user-friendly search bar for effortless permission searches. The update also includes translations for all supported languages.
9	Improve ment	A4L-12183	Hide/Show Hearing Details From Client Portal	Hearing details can now be set hidden by default from the requesters, with the option to make them visible on a per-hearing basis. In the "Add Hearing" and "Edit Hearing" sections, an option has been introduced to show or hide the hearing in the client portal. For older hearings, they will be made visible if the related matter is set to be visible.
10	Improve ment	A4L-11616	New Search Bar for Document type in Upload Contract	A new search bar has been introduced to facilitate easy searching for document types during the contract upload process.
11	Improve ment	A4L-11360	Clone Invoice Template	Users now can duplicate invoice templates, allowing for the seamless copying of templates from one entity to another.
12	Improve ment	A4L-11577	Delete a non-empty Folder.	Users now can delete folders, even when they are not empty, with all the folder content being removed as well.
13	Improve ment	A4L-11118	Invoice Rounding	The billing module now offers support for two rounding approaches on invoices, credit notes, and debit notes: Line Item Rounding (currently implemented) and Global Rounding Users have the flexibility to select their preferred rounding approach when creating or editing an entity. It's important to note that for Zatca entities, Line item rounding is mandatory.
14	Improve ment	A4L-12376	Remove the Link between Currency and Value in Contracts	On the contract page, currency and value fields have been separated. Users are no longer required to fill out one before the other; now, each field can be filled out independently.

15	Improve ment	A4L- 11944	"Add Comment to Contract/Document" Notification	A new notification, "Add Comment to Contract/Document," has been incorporated into the notification scheme. This will alert the relevant stakeholders when a comment is added to a contract by a Lexzur user.
16	Improve ment	A4L- 11595	Include Requester in Approval Matrix	You now have the option to include the Requester type in the approval center for any contract, and it will display the requester's name in the matrix.
17	Improve ment	A4L- 12317	Custom fields on the Tasks Add Form	You can now effortlessly extend the custom field list for tasks and conveniently complete the fields directly from the Task Add Form.
18	Improve ment	A4L- 12267	Login History Report for SSO Users	A login history report is now available for users using SSO users.
19	Improve ment	A4L- 12244	Expand the Judgment Text Box	Users now can enlarge the judgment box field within the set judgment window, allowing them to expand the text box and include the necessary details.
20	Improve ment	A4L- 11994	Enhancement to Reminder Summary Functionality	Improvements have been made to the Reminders Grid, enabling users to expand the summary field for easier viewing of longer summaries. Additionally, clicking on the summary link now provides the option to edit the reminder and navigate to the related item, whether it's a company, contract, matter, etc.
21	Improve ment	A4L- 11865	Confirmation Message when Closing Tasks Add form	A confirmation message will now appear when you attempt to cancel or close the Task Add Form, ensuring that users are prompted before discarding any modifications.
22	Improve ment	A4L- 11791	Updating Exchange Rate in Money Forms	Automatically save the bill upon updating the rate. In the edit bill and debit note, the exchange rate update button will save the record. For bill, debit notes, credit notes, and invoice exchange rate edits a checkbox is added to modify only the current record without changing the global default exchange rate. Also, the invoice template will reflect the invoice exchange rate instead of the current default system rate.
23	Improve ment	A4L- 11553	Add Opponent Lawyer to the Conflict Check	The conflict check report has been enhanced to show the opponent's lawyer if they are listed in any of the litigation stages. Additionally, the report will now display the relationship of the searched contact separately, indicating whether they are a client, a related person/company, an opponent, or an opponent lawyer.
24	Improve ment	A4L- 11380	Split Time Entries Save Changes Alert	A new confirmation alert will now be presented after splitting time and attempting to exit the time entries page without saving changes.
25	Improve ment	A4L- 11350	Enhanced Error Message for Matters	Improved error messages will now be displayed when attempting to save a matter with incorrect data or invalid inputs.
26	Improve ment	A4L- 11144	Show/Hide Attachments Type and Keyword from the Client Portal	In the configuration settings for request types (applicable to both matters and contracts), a new checkbox has been introduced when adding an attachment field. This checkbox allows users to choose whether the attachment type and keyword will be visible from the CP, with the default setting being hidden. If the checkbox is left unchecked for a specific field, Client Portal (CP) users will have the option to manually select a type and keyword for the uploaded documents.
27	Improve ment	A4L- 11089	Additional ID of Commercial Registration on Zatca invoice	The Zatca invoice will now include the commercial registration number of a company as an additional identification (ID).
28	Improve ment	A4L- 11088	Services Default Values	Default values for services have been modified.
29	Improve ment	A4L- 11024	A New Alert for Override Privacy when creating a new Administrator	A new alert has been implemented when creating an administrator-type user. This alert informs the admin creating the account that administrators will be automatically granted the 'Override Privacy' option.
30	Improve ment	A4L- 10842	Enhanced Actions in Email Engine	Email enhancement now allows for easy navigation between lines after completing entries in the fields.
31	Improve ment	A4L- 10612	Contract Histories Combination	Contract histories, including approval, signature, renewal, audit reports, and more, have been combined into a single table within the contract general information.
32	Improve ment	A4L- 10343	Customize Litigation Dashboard widgets	A new widget, "Cases per Status," has been introduced to the litigation dashboard. This widget displays all the cases per status, visually represented in a pie chart.
33	Improve ment	A4L- 9792	Apply Filters and Show Details on Reports	Now, you can apply filters to reports while retaining the ability to view them in detail.
34	Bugs	A4L- 12388	App4legal Appear instead of Lexzur in Comments Excel Template Files	
35	Bugs	A4L- 12223	Partner Shares are Not Showing Error on Invalid Partner
