

How to Configure Contra ID

Objectives

- Configure Contract's ID number

Steps

The Contra ID configuration can be done from the Contracts Settings, therefore go to the **System Settings Contracts & Documents ID Configuration**

The ID In Contra is composed of 4 sections :

- **First ID Section:** The **Contract Type Prefix** i.e. The abbreviation of the contract type (for example Commercial Lease Agreement might be CLA).
- **Second ID Section:** Use any **keyword** or **abbreviation** that will allow you to locate this contract/document later.
- **Third ID Section:** This section will be used if you want to add the **date** to your contract. YYYYMMDD is the default format.
- **The Forth Section** is the number auto-generated by the system.

The Contract Type Prefix can be edited from the [Types Page](#).

Only 5 characters are allowed in the Second ID Section, and the Default keyword is CT

Settings / ID Configuration

Configure Contract/Document IDs by enabling or disabling the below ID sections ?

First ID Section :

Second ID Section :

Third ID Section :

?

?

?

CT

YYYYMMDD

Save

COA

CT

20230504

1234

The first 3 sections can be enabled/disabled on the ID Configuration page in the settings as needed.

The enabled sections will only appear in the Contract ID. So, the ID of the Contract now will look like this if all the sections are enabled:
